

- [002]        This application is a national stage completion of PCT/EP2003/006735    ♦♦  
              filed June 26, 2003 which claims priority from German Application Serial    ♦♦  
              No. 102 29 513.1 filed July 2, 2002.    ♦♦
- [003]        FIELD OF THE INVENTION    ♦♦
- [004]        The present invention relates to a transmission shift system comprising  
              a synchronizing device for idler wheels pursuant to the preamble of patent    ♦♦  
              claim 1.    ♦♦
- [005]        BACKGROUND OF THE INVENTION    ♦♦
- [011]        ~~This objective is achieved pursuant to the invention through the features~~    ♦♦  
              ~~of patent claim 1. Further variations and advantages result from the dependent~~    ♦♦  
              ~~claims.~~    ♦♦
- [012]        SUMMARY OF THE INVENTION    ♦♦
- [017]        BRIEF DESCRIPTION OF THE DRAWINGS    ♦♦
- [018]        ~~The invention is explained in further detail in the following based on the~~    ♦♦  
              ~~attached figures. They show:~~ will now be described, by way of example, with    ♦♦  
              reference to the accompanying drawings in which:    ♦♦
- [022]        DETAILED DESCRIPTION OF THE INVENTION    ♦♦
